WORK EXPERIENCE

2pr.io **Nov. 2024 – Sep. 2026**

Technical-Founder *Remote*

- Architected, developed, and operated an AI-powered LinkedIn content marketing SaaS product to grow it from $0 to $10k MRR in 1.5 years
- Built the backend and service integrations using Python, FastAPI, OpenAI and Anthropic APIs, with deployment and operations on Azure and Ubuntu. Implemented core product workflows and integrations for payments, analytics, affiliate tracking, and customer support, including Stripe, Amplitude, Tolt, and Crisp.
- Worked closely with the business co-founder and designers to translate product requirements into working software

Retriever **Dec. 2023 – Apr. 2024**

Founder *Remote*

- Came up with the idea and developed a "Drag and Drop Your Data" multi-agent RAG web platform
- Built a modular RAG toolkit supporting both proprietary and open-source language models deployment. Designed sample components for retrieval-augmented generation and agent-based workflows, enabling adaptable LLM application architectures.
- Commercially transferred the toolkit's codebase rights and technical know-how to an IT corporation in April 2024. Continued independent AI engineering and consulting work following the transfer. The main contribution was design of the first commercially available Text-To-SQL agent on the market.

Wone IT (Awara IT) **Jan. 2022 – Oct. 2026**

AI Architect *Remote*

- Designed and delivered AI and ML solutions for enterprise clients, owning technical architecture, implementation planning, stakeholder communication, and production delivery. Extensive usage of Azure Cloud services, including but not limited to: AI Foundry, Data Lake, Blob Services, Cosmos DB, Cognitive Services
- Built LLM-powered applications and agents for enterprise use cases including RAG internal knowledge access, customer support, code review, smart alerts, marketplace scraping, sentiment analysis, review classification, all working under client NDAs.
- Hired and led an engineering team of 6 people, coordinating delivery, budgeting projects, and owning client expectation management

ESG Now **Dec. 2021 – May 2022**

Founder *Moscow, Russia*

- Founded an early-stage initiative to develop an ESG rating methodology adapted to Russian socioeconomic conditions. Led a team of seven students researching and designing the rating framework.

EDUCATION

Presidential Academy **June 2023**

Bachelor in Economics / Project Management *Moscow, Russia*

- **GPA: 4.8/5.0**
- Exchange program with University of Pisa

SKILLS & INTERESTS

- **Technologies:** Python, FastAPI, Docker, MCP, Proprietary & Opensource LLMs, Milvus, PostgreSQL,
- **Skills:** Technical Leadership, Quick Learning, SaaS Marketing, Budgeting, Client Management
- **Interests:** Videogame Development; Bouldering; Zen Buddhism; Traveling;
- **Languages:** Russian (Native), English (C2), Spanish (B1).
